

# Our Services

The goal of DUCA Solutions has always been to provide a Client with a high quality complete teak package.

Therefore we have a number of highly qualified "floating" teams for all purposes, starting from the surface preparation, taking laser measurements, CNC production of teak covers, vacuum installation on board, and completing the package with teak handrails and deck furniture.

## About Us

DUCA Solutions is a passion for marine carpentry, backed up by 30 years of experience. Our professionalism, quality, efficiency and flexibility make us stand out from our competitors.

We do focus on both new build and refit teak decking markets, and working for both ship yards and direct for captains and crew.

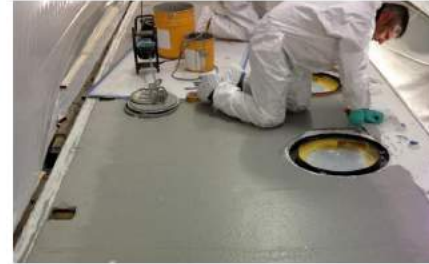

Our main factory is located on a picturesque Tuscan coast of **Northern Italy**, while having local teak refit centers in **Palma de Mallorca, Barcelona, South of France** and **North of Germany** in order to quickly and efficiently serve our clients throughout Europe.

## Why Chose Us?

- Turn-Key service in decking, furniture, varnish and surveys
- Continuous innovations and technical development
- Installation of decks by vacuum
- Taking 3D measurements & CNC production
- International logistics & partners
- Direct teak suppliers in Asia
- Staying within budget & deadlines

### ✓ Deck Leveling

Before teak installation, our leveling team primes and levels the steel or aluminium surface with a polyurethane flexible material – Sika Transfloor.

### ✓ Teak Decking

Following the 3D laser measurements on board, our teak decks get fully prefabricated with margins by CNC machine in our factory and then installed on board by vacuum.

### ✓ Esthec Decking

As Esthec composite decking is becoming more popular for its freedom in colors and designs, DUCA offers these too as a valid alternative to traditional teak decks.

### ✓ Handrail & Furniture

We have the qualifications and availability to carry out the most complicated carpentry works such as teak or mahogany caprail, teak on jacuzzi, tables, sunbeds & more.

## DUCA Solutions

### Main production facility

Via Luigi Russo, 28  
Industrial area Picchianti  
57121 Livorno (LI)  
ITALY
